April 2017

Viewing pleasure in its purist form.

Metz Cosmo: Compact entry-level model

Metz's latest addition to the range is your entry into the universe of premium televisions: the Cosmo product family features full HD-ready televisions and is now available in screen sizes of 43 inches and a compact 32 inches. Modern LED technology and 200 Hz MetzVision picture technology provide an incredible viewing experience, while an integrated multi-tuner sets it up for all current reception technology, including the new DVB-T2 HD terrestrial broadcasting standard.

The Cosmo product family is now available and offers easy connectivity and viewing pleasure in its purist form. The Cosmo's elegant design will impress with its exclusive, anodised silver, brushed aluminium surround and a stylish rotatable table stand comprising an elegant glass plate with a metal column. With modern LED technology, 200 Hz MetzVision picture technology and the latest High Efficiency Video Coding (HEVC/H.265) for receiving the most sophisticated of HDTV sources, the picture is more than outstanding.

The Cosmo's slimline soundbar comes with either 6 (Cosmo 43) or 4 (Cosmo 32) front-facing passive speakers that deliver an exceptionally high output of 30 watts (Cosmo 43) or 24 watts (Cosmo 32). The MetzSoundPlus technology with a sealed 2-way bass reflex system ensures an impressively full, clean sound with brilliant treble and bass tones.

The convenient Metz operating system completes the new Cosmo and transforms it into a television suited for exacting requirements. Thanks to an integrated multi-tuner (DVB-C/T2/S2) and a CI+ slot for CA modules, the Cosmo is well equipped for all types of reception technology, including the new DVB-T2 HD terrestrial broadcasting standard. Three HDMI connections, a WiFi interface, a LAN network connection, two USB ports and a Mini EURO-AV port offer extensive connection options. The Cosmo also offers USB recording, internet radio, a smart TV portal and access to numerous services, such as the media libraries offered with the new HbbTV television standard.
